Asthma Action Plan (AAP) AAP is a simple plan that describes how to achieve long term control and what to do when asthma symptoms arises.

DPH - Connecticut
Occupational therapy (OT) is the use of assessment and intervention to develop, recover, or maintain the meaningful activities, or occupations, of individuals, groups, or communities. It is an allied health profession performed by occupational therapists and Occupational Therapy Assistants. OTs often work with people with mental health problems, disabilities, injuries, or impairments.

Occupational therapy - Wikipedia
This guideline lists core management steps. It is based on 2007 National Asthma Education and Prevention Program Expert Panel Report 3, Guidelines for the Diagnosis and Management of Asthma.

General Principles for the Diagnosis and Management of Asthma
Asthma deaths have decreased over time and varied by demographic characteristics. The rate of asthma deaths decreased from 15 per million in 2001 to 10 per million in 2016. Deaths due to asthma are rare and are thought to be largely preventable, particularly among children and young adults.

You Can Control Your Asthma | Features | CDC
Asthma is the result of chronic inflammation of the conducting zone of the airways (most especially the bronchi and bronchioles), which subsequently results in increased contractability of the surrounding smooth muscles. This among other factors leads to bouts of narrowing of the airway and the classic symptoms of wheezing. The narrowing is typically reversible with or without treatment.

Asthma - Wikipedia
Input: Occupational Risks Risk of Airway Diseases Work-related asthma. Asthma is an inflammatory airways disease causing episodic, reversible airways obstruction. Work-related asthma refers to both new-onset asthma caused by work and pre-existing asthma exacerbated by work.
